Comment

CPRE North Yorkshire ('CPRENY') welcomes the opportunity to comment on the above application in the Yorkshire Dales National Park.

The applicant has not submitted enough detail to determine whether this application is located in a position which will impact the surrounding environment, including the protected landscape. Connection to the grid or where it hopes to serve has not been set out nor have any materials been described. A construction management plan has not been submitted.

CPRENY believe that the proposals for the ground-mounted solar panels require full planning permission due to the size of the proposed area and number of panels to be installed, however, no information has been submitted to aid determination. The applicant should be required to provide further information before any determination is made.
